Profile Summary

- Full Stack Developer skilled in JavaScript, TypeScript, and Python. Experienced in building scalable web and mobile applications using React.js, Node.js, Express, and React Native.
- Proficient in RESTful API design, authentication & authorization (JWT), real-time communication (Socket.io), and deployment automation (CI/CD using Docker, GitHub Actions, Netlify).
- Strong understanding of cloud platforms (AWS), microservices, and performance optimization for modern full stack systems.

Education

Aditya Engineering College, B.Tech in Computer Science and Engineering
CGPA: 7.72 / 10

Technical Skills

Languages: JavaScript, TypeScript, Python, Java, C, HTML, CSS

Frameworks & Libraries: React.js, React Native, Node.js, Express.js, Angular, Vite, Tailwind CSS, Bootstrap

Backend & APIs: RESTful APIs, JWT Authentication, OAuth 2.0, Socket.io

Databases: MongoDB, MySQL, PostgreSQL

DevOps & Tools: Docker, GitHub Actions, Netlify, Postman, VS Code, Figma

Cloud Platforms: AWS (EC2, S3), Google Cloud, Firebase

AI & Automation: ChatGPT, LangChain, OpenAI APIs, Gemini, Perplexity, Zapier

Other Skills: Agile / Scrum, Version Control (Git, GitHub, GitLab), Continuous Deployment / Integration, Data Privacy & Encryption

Experience

Technical Hub – Full Stack Trainee

- Engineered and launched 4+ full stack (MERN) applications, achieving a 95% delivery success rate.
- Designed RESTful APIs, integrated authentication using JWT, and optimized backend data flow for 120+ users.
- Collaborated with Agile teams to implement continuous deployment via GitHub Actions and Docker.

Infosys Springboard – Full Stack Intern (Remote)

- Built and delivered two production-ready full stack web applications with 25% faster feature rollout.
- Integrated responsive frontends with backend APIs, improving UI performance for 80+ daily active users.
- Created automated API workflows using Postman and implemented CI/CD pipelines for seamless deployment.

Projects

Civix – Digital Civic Engagement Platform

- Engineered a civic engagement platform enabling 500+ users to submit and track public petitions.
- Constructed high-performance, containerized microservices using React.js and Node.js, reducing server response time by 40%.
- Enhanced user engagement by 15% via real-time sentiment polling and notification systems.

GoGrocery – Real-Time Grocery Delivery App

- Designed and launched a React Native app with real-time tracking using Google Maps API, serving 50+ daily users.
- Implemented push notifications and event-driven updates, reducing missed deliveries by 40%.
- Deployed backend microservices on AWS with continuous integration pipelines for reliability.

Farmers Touch – AgriTech Platform (Smart India Hackathon 2024)

- Led a 6-member team to design an AI-powered agri platform for farmers, integrating weather data and agri-market APIs.
- Created modules for crop prediction, contract farming, and multilingual advisory features using Node.js and React.

Achievements

- Selected among Top 200 teams (out of 20,000+) in **Smart India Hackathon 2024**.
- Solved 120+ coding problems on LeetCode and GeeksforGeeks, strengthening algorithmic thinking and data structure proficiency.
- Earned 5★ Python, 5★ C++, and 4★ Java ratings on HackerRank.
